published. Our paper goes to ev-
ery post office in Perry County
and almost every one in Lee, Ma-
goffin, Owsley and Wolfe Coun-
ties.

tain trade, try an ad in the BREATHT
ITTY COUNTY NEWS.

If you have any houses or lots

We venture the assertion, That
not one percent of our people want
to be cut off from Judge Riddell's
district.

ONE of the reasons advanced for
the new district is, the crowded
condition of our docket. Judge
Riddell will soon clear it up if he
gets a chance. Why not let him
have the opportunity?

A Bill is now before the Legis-
lature creating a new Judicial dis-
trict, composed of the counties of
Breathitt, Knott, Magoffin and
Wolfe counties, the Governor to
appoint a Judge and Common-
wealth's Attorney. Whom do you
think he will appoint?

The Rev. Irl R. Hicks 1904 Al-
manac.

The Rev. Irl R. Hicks Almanac for
1904 is now ready. It will be mailed to
any address for 20 cents. It is surpris-
ing how such an elegant, costly book
can be sent prepaid so cheaply. No
family or person is prepared to study
the heavens, or the storms and weather
in 1904, without this wonderful
Hicks almanac and Prof. Hicks' splen-
did paper, "WORD AND WORKS",
both are sent for only one dollar a
year. "WORD AND WORKS" is among
the best American Magazines. Like
the Hicks Almanac, it is too well
known to need further commendation.
Few men have labored more faithfully
for the public good or found a warmer
place in the hearts of the people.

A WORLD'S FAIR INVENTION.

Electric Automobile Chairs, With Ab-
solute Safety Attachments, a Fea-
ture of the 1904 Exposition.

Electricity is the motive power that
will propel the automobile chairs at
the World's Fair in St. Louis in 1904.
These chairs are a new invention, and
are the result of three years' study
and experimenting by Sempie S.
Scott, a young St. Louis inventor, who
recently obtained the concession to
operate them during the Exposition.

The chairs have a uniform speed of
three miles per hour and the operator
has no control over the speed. The
same rate is maintained up hill, down
hill, or on the level. The machine is
simplicity itself, and the World's Fair
visitor may operate it as well as the
guide, who will accompany him if he
desires. The chair takes the form of
a low phaeton without a cover. There
are four wheels, two large rear wheels
and two small ones under the foot
rest. All are pneumatic tired. The
seat is upholstered in cane as are seats
on street cars and the summer rail-
way cars. Behind the seat is a box
which contains the batteries which
generate the power to operate the ma-
chine. If two visitors desire to oc-
cupy the chair, and the service of a
guide is wanted, he can sit on an ad-
justable seat at the rear.

On the inside of the chair, attached
to the arm, is a lever, which puts the
chair in motion or stops it at the will
of the rider. A long lever attached to
the front truck has its handle directly
in the center of the chair within easy
reach of the driver. A gentle pres-
sure guides the machine in the desired
direction.

The most admirable feature of the
entire machine is the sensitive rail
which guards the chair on all sides
save at the rear. This absolutely pre-
vents accidents. When the rail comes
in contact with any object, even
though it weighs but a pound, it presses
against a device that locks the wheels
and brings the chair to a dead stop.
